CliniShield® ADVANCE

Protective Barrier Cream

Product Description

CliniShield Advance Protective Barrier Cream provides an effective barrier to protect intact and injured skin from the harmful effects of bodily fluids from Moisture-Associated Skin Damage (MASD).

Indications for use

CliniShield Advance Protective Barrier Cream offers waterproof, long-lasting protection (up to 24h) against moisture-associated skin damage (MASD) for both intact and injured skin. It is indicated for use in incontinence care, protecting skin from exposure to urine, faeces, and other bodily fluids. The cream moisturises and provides a protective barrier restoring the skin's hydration. The product may be used on adults and children.

Benefits

- Cost effective: Moisturising formula covers a large area of skin
- Long lasting protection (up to 24h) from Moisture-Associated Skin Damage
- Can be used on intact and injured skin
- Waterproof, non-greasy formulation that resists wash-off, is easy to apply, and reduces the number of applications needed
- Does not block incontinence pad absorbency
- Skin friendly, non-sting and non-sticky formulation
- Dries rapidly on the skin
- Alcohol, fragrance, parabens and phthalates free. Not made with natural rubber latex
- Helps prevent skin irritation, breakdown, and damage caused by incontinence (urine and faeces)
- Suitable for use on children

Contraindications

Do not apply to infected skin, open wounds, and deep puncture wounds. Do not use if known allergy or sensitivity.

Caution

Use only as directed. For external use only. Do not use near eyes, ears, nose, or mouth. For single patient use. May not be suitable for use on babies under 30 days old. Dispose of safely after use.

Instructions for use

1. Skin should be clean and dry prior to application.
2. Apply a thin, even layer to the area to be protected.
3. If CliniShield Advance Protective Barrier Cream is applied to an area with skin folds or other skin-to-skin contact, make sure that skin-contact areas are separated to allow them to dry before returning to normal position.
4. Re-application is recommended every 24 hours, depending on the frequency of cleaning. For extreme cases of diarrhoea it might be necessary to reapply the barrier cream after each episode.

CliniShield® ADVANCE

Protective Barrier Cream

Warning

Keep out of reach of children. Do not use in cases where there is a known sensitivity to any of the ingredients. Discontinue if irritation occurs and report to the manufacturer quoting the LOT number. Should redness or other signs of irritation appear, or irritation persists, consult a medical professional. If eye contact/ingestion occurs, seek immediate medical attention. Do not use if the packaging is damaged. In the event that the tube or sachet is received damaged before use, contact Clinimed. Recycle empty tubes and cartons in accordance with local regulations.

Ingredients

Aqua, Glycerin, Pectin, Caprylyl Methicone, Trimethylmethoxysilicate, Dimethicone, Cetearyl Glucoside, Sorbitan Olivate, Cetearyl Alcohol, C12-15 Alkyl Benzoate, Phenoxyethanol, Chlorphenesin, Citric Acid

Storage and Shelf Life

Store away from direct sunlight at ambient temperature and humidity.

For shelf life, refer to the expiry date on the tube or sachet.
